

2009, the year EXOR was established. EXOR's Net Asset Value (NAV) is tracked against the MSCI WORLD INDEX (in US\$)

FCA which almost doubled its market capitalization in 2017 following the acquisition of PSA. This is a testament to the strong performance of the company and its ability to navigate a challenging environment.

Two of these seem particularly plausible:

- Holding companies are perceived to give disproportionate advantages to their controlling shareholders
- Buying shares in holding companies is seen as less attractive than buying shares in the listed businesses
- By 50% of our peers have been a good investment. In a period characterized by the over-performance of passive indexes, it is interesting to note that these strong performers have been a good investment. Many of the holding companies that we have studied are family-controlled. This is of course of particular interest. Past performance is of course not a good indicator of future results and we are very conscious of survival bias. They tend to be prudent in how they are run, particularly in relation to financial matters, which means that they are aware of changes in the world and are able to adapt when those changes require it. They have strong cultures, clearly defined purposes and a sense of responsibility. Their cultures, rather than their financial performance, are what we are looking for.

Like many of our peers we continue to trade at a discount, which means you are effectively getting PartnerRe for less than its intrinsic value. We analyzed the investment portfolios of these holdings to identify businesses they own which meet the following criteria:

GROSS ASSET VALUE	INVESTMENTS	CASH & CASH EQUIVALENTS	NET ASSET VALUE
US\$ 2,000 million	98.7%	1.3%	US\$ 1,987 million

INVESTMENTS (98.7% of GAV)

I would now like to turn to some of the businesses within our portfolio, starting with FCA which is both our most valuable and our most recent acquisition. In 2017 FCA sold 4.7 million cars, generating revenues of ~€111 billion. This was similar to its 2016 revenues, but with a significant improvement in profitability and cash generation. This improvement in profitability and cash generation is the result of deciding to exit the passenger car market in Europe. This extremely strong performance is a credit to FCA as a whole and is particularly due to Sergio's leadership. We are reinvesting in the car industry as we believe that the car industry is facing and the need for a new paradigm is being developed to meet CO2 emission targets which, by 2022, will be significant. One example is electrification which is being developed to meet CO2 emission targets which, by 2022, will be significant. As we face this transition, it is worth reflecting on the reasons why leading entrepreneurs of the last century added value. It was John D. Rockefeller who then enabled the combustion engine to thrive by stabilizing the price and supply of oil. The journey from the combustion engine to the non-combustion engine will be gradual, with hybrid solutions playing a key role. During this transition we need to make sure, just as we did last century, that we have the right technical solutions. The outlook for FCA is very positive, with the Jeep Brand continuing to be particularly strong. Jeep now makes

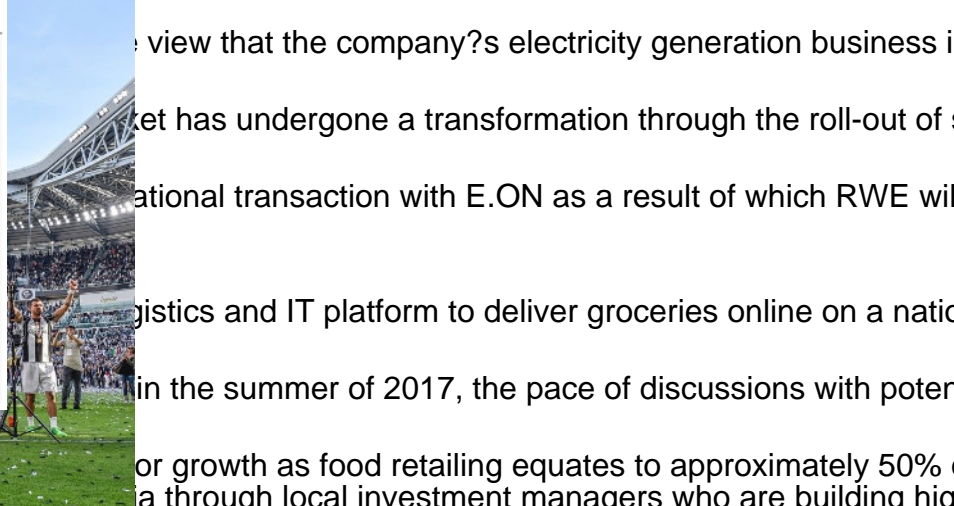

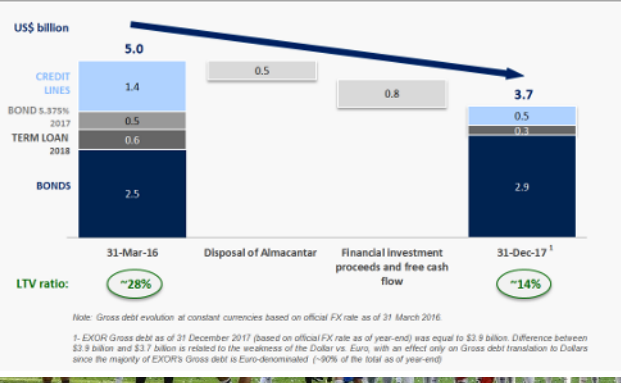

All-new 2018 Jeep Wrangler Rubicon and Sahara with various historical Wrangler vehicles. 2017 has also been the year of Alfa Romeo's revival with the launch of Giulia and Stelvio proudly conceived and designed in Italy. The 2018 targets set by FCA in 2014 seemed unreachable then but, as we get closer, seem increasingly possible. I would like next to spend time on PartnerRe, our second most valuable business and our most recent acquisition. This difficult year represented a robust test for PartnerRe in its second year of our ownership and we have studied the results. Despite the challenging environment, PartnerRe reported top quartile performance amongst its reinsurance peers. These positive results have been driven by three factors:

- The reduction of Cat exposure, mainly by the use of retrocession. This decision was taken because of the company's ability to build a well-diversified underwriting portfolio in terms of geographies and products.
- The actions undertaken to reduce the company's expenses which, excluding severance and transaction costs, have been significant.

Savings are expected to continue to grow in 2018 as the full year impact of these changes comes through and importantly, these savings are not limiting the company development and have already been partially reinvested in the business. In April 2017 PartnerRe completed the acquisition of Aurigen, a leading Canadian Life reinsurer, which will contribute to the company's growth. Notwithstanding the positive Life reinsurance performance, which has been solid with 37% growth in underwriting volume, the renewals in January 2018 have been positive for PartnerRe with volumes and margins up for the business.

His two largest positions are RWE, the largest conventional (nuclear, coal, and gas-based) electricity producer in Europe, and E.ON, the largest energy company in Germany.

GROSS DEBT EVOLUTION

We have prioritized India because of its future economic growth potential. India is a \$2.4 trillion economy growing rapidly. The Indian public equity market offers a very broad and diverse opportunity set, representative of the various sectors. In 2017, PartnerRe also strengthened its relation with Tishman Speyer to make additional investments in real estate. To complete our overview of PartnerRe's investments, it is worth highlighting the good returns it has achieved. EXOR's ownership has allowed PartnerRe to improve its capital position by adopting a prudent dividend policy. ~~has been the last, possibly like a our, not having the greatest have in us as significant time year in its five years of~~ Juventus has also won the last three Italian Cups and made it all the way through to the final of the Champions
